

The Opening and
Activation of the
Stellar Gateway

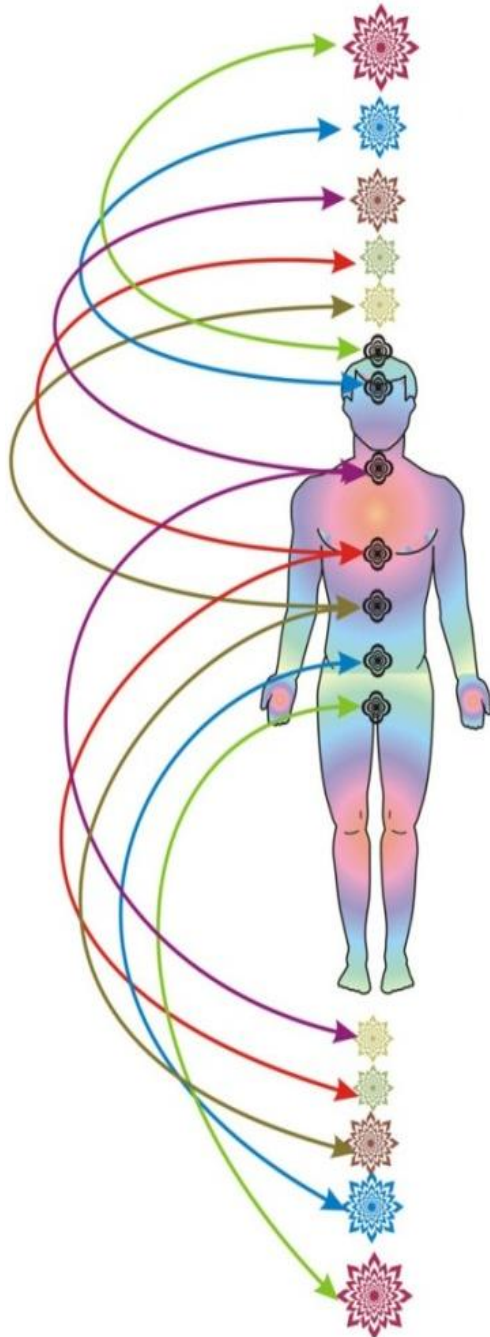

Introduction

We have many dormant points of energy in our Auric field. These points are progressively activated as we journey our life path towards self-realization and enlightenment. They are sleeping chakras that start to work when we open ourselves to the new dimensions of our being.

We may be conscious of some, but there are many that still remain untouched by our awareness. In theory and independent of our complete awareness, all these chakras, not just the seven primary ones commonly known, are influencing us. These “new” vibrational frequencies have the primary function to blend the transformational energies that is coming from diverse places of the infinite Mind to assist on the transformation of both ourselves and our Mother Planet.

In order to accommodate these changes, our brains has been adapting to the infinite changes, now enabling themselves to perceive and process the new sensory information that extrapolates the experiences of the regular senses. The activation of these “sensors” will undoubtedly ignite new perceptual functions to your scope of reality.

The evolutionary fall of the Human race, caused the deactivation of certain vibrational circuits, also affecting the blockage and atrophy of most of our DNA template capabilities. This factor isolated some of our channels of communication with the internal worlds and, ultimately, the regular access to the wisdom of the soul causing and contributing actively to the illusion of our separation from the Divine

and the isolation of consciousness imprisoned in a physical body.

In order to revert this state, it is imperative that one awakens the original and ancient connections, the wisdom of your body, through the stimulation of this neuro-net reigned over by the Pineal and the Pituitary glands. Through these stimuli, one must exercise the new “muscle”, awakening the internal and personal codes that will reveal the multi-faceted aspects of our soul, life and soul purposes, divine mission, connection with superior energies, Infinite Wisdom-Divine Sophia and spiritual consciousness.

The First Two Transpersonal Chakras

The Soul Star: the Chalice of Soul Energy

Located 6-8 inches above the head, the Soul Star is the chakra that is the interface for our relationship with the Universe. Symbolically, it is the chalice that captures and filters the Divine loving energy received from the Stellar Gateway. It is the place where the energies of the Stellar Chakra, the vibrations of the Cosmic Rays, are purified and refined, regulating their use over the energetic fields of the human consciousness. The element of this sacred grail functions as the receptacle of higher energies and it is responsible for the expression of higher wisdom, as a primarily element of human essence.

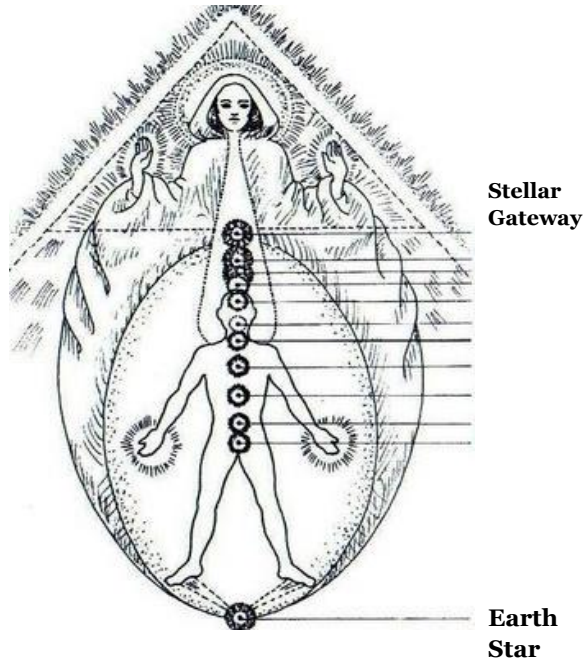

The Stellar Gateway: The Divine Essence or Omnipresence

Situated approximately 12 inches above the head, the Stellar Gateway’s function is to receive, filter and harmonize the extra-physical bodies with the energy from the stars, or other Solar Logos. Our Soul Star primarily receives the influence of our Solar Logos, but the initial point of this is the Stellar Gateway where we start assimilating the Light codes of other Solar Logos, which unconditionally contributes to the “music of the spheres” and the expansion of the plan of creation.

This point is intimately connected with our Body of Light and with the Divine I AM Presence, as a universal symbol of pure Divine love. Its symbol is the star of six points, which encompasses and condenses all the higher and sacred energies of the 12 Cosmic Rays.

Intunement

The preparation for this activation is a process called intuning, or Inttunement. In this specific case, if you have already done some of the Stellar Code™ or Soul attunements, you will already have learned to activate your soul and have it working at your will.

With each of these exercises, begin by activating your Soul Star by reciting the Soul Mantra three times.

Exercise 1

Now begin opening the communication with the Stellar Chakra through the chanting of the following mantra:

*OM MAYA MA KITA RAKU ANA PEYA
NAMU*

This mantra is known to reproduce the vibrational toning that comes from your Family of Light and brings these frequencies progressively inward to your other physical chakras. This will clear your Central Channel and allow the harmonious building of your Antahkarana.

We recommend the chanting of this mantra for at least 12 times, once for each of your Soul Extensions and one afterward in honor of your own United Self.

Exercise 2: Integration of your conflicting “Aspects” of the Self

This is an important step to start the harmonizing process and the activation of all the energy centers, nerves and glands related to the awakening of the Stellar Gateway Center.

Ask your I AM Presence to enfold you in a Pyramid of Golden Light:

*I ask my I AM Presence to enfold me in a
Pyramid of Golden Light.*

Align your Central Column of Light to the Source and to the Earth. With your mind's eye, visualize the sub-personal chakra below your feet. Focus on your heart and FEEL your powerful Love.

Stay in the place of contemplation for at least 5 minutes, breathe deeply. Look at or feel around you for any discordant thought-forms, emotions, habitual reactions, fear or unforgiving aspect of your Self which you are aware of and draw them with your Love and Will into your Central Column of Light, transmuting them into the Light.

With a firm will, Decree:

*By Divine Decree, in the Name of God
Goddess and under the Law of Grace, I call
forth this aspect of _____ from
within myself.*

*I now break all agreements that I have
made with you. I so will this with full
awareness and may it be so, in all
frequencies, all dimensions, and all the time
lines, from this
Universe, parallel
lives and
multiverses.*

*I AM now aware. I
AM the Master of
my world. I
command you, I
order you to move
into my Central
Column of Light
now.*

*I AM That I AM, I
AM That I AM, I
AM That I AM.*

Repeat the whole
decree 3 times.

Note: The
transfiguration and
integration of the conflicting “aspects” is
powered predominantly by feeling your
Loving acceptance towards these Aspects’ of
the Self, as they are aroused in diverse
moments of your life as the result of a
defensive situation, not by your
imagination. Judgmental patterns and the
vicious cycle of self-blaming will never allow
you to be liberated from their influence.
Training your mind to be aware of your

feelings and thoughts is vital to for the
process of clearing to the maximum
potential. The Clearing, Transmutation and
Integration of Aspects are essential for the
deep and participative evolvment of your
Soul into Higher realms of Consciousness.

Exercise 3

Calm your mind and breathe deeply. Inhale
and exhale deeply and calm your turbulent
thoughts.

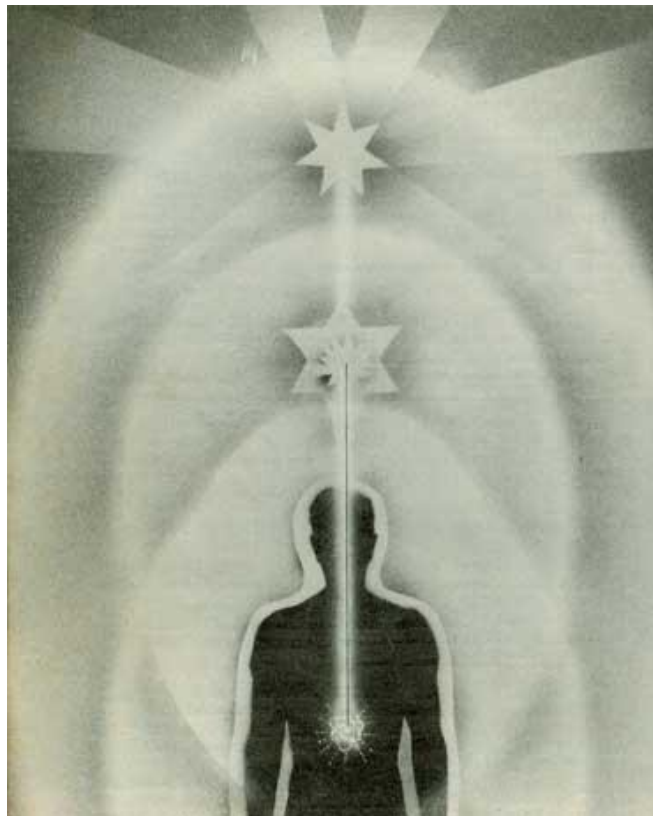

Empty your mind
and still your
thoughts.

Activate your Soul
Star by reciting the
Soul Mantra.

Mentally visualize
your Soul Star as a
small sun above
your head
approximately 6 to
8 inches above your
head. Mentally rise
above this point and
allow yourself to
contemplate the
vastness of the
universe and the
open heavens.

Above you there is only infinitude and
plenitude.

Consciously inhale that space inside into
your entire being. Bring the energy of the
eternal and everlasting inside all the way,
entering through the top of your head to the
place of your heart. The infinite of this
energy is purity, peace, love and Light.

As this energy traverses your meridians, it comes with an incredible transformational potential to clean, harmonize and amplify your possibilities and abilities.

One more time, visualize the same infinite energy going down through the heart entering the solar plexus and gathering your personal energy signature.

Continue to inhale and exhale the energy, purifying and cleaning all the space between cells and between your extra-physical bodies.

Continue this journey descending from the abdomen, the genital area and the legs until reaches the feet.

Finally, see the energy carrying the energy and all the cleansed material penetrating firmly but softly into the center of the Earth.

Breathe deeply, basking in the lightness of your being, completely purified and integrated. Breathe deeply three times.

Now, imagine the energy coming back, from the point below your Earth Star, from the Earth Gateway. Restored and transmuted, all the negative energy that was sent forth initially is returning to you, regenerated and transformed into pure creative and grounded Light.

Imagine with your mind's eye that this emanation is ascending through your legs, filling the base of your column, and moving up to abdomen, solar plexus, your back, arms and head, until it finally reaches your Crown Chakra. The strength of this new creative energy acts like a sacred fire that burns all the obstacles, impediments, residues and energy blockages that may

stand in the way of your main channel, your Rainbow Bridge or Antahkarana.

Now, simultaneously, feel the energy coming from heavens and the energy coming from earth moving up and down your Ida and Pingala channels passing through the base of your column, In a circular movement, the encounter of these two currents are fully activated to clean: rage, impatience, attachment, materialism, guilt, shame, vices and violence, family problems, excess of responsibilities, lack of enthusiasm.

The energy currents will harmonize and provide: survival, physical will to live, stability, determination, grounding, centering and focusing of mind.

Repeat this exercise, having these two forces meeting at each chakra and feel the transformational energies, progressively being integrated into your main systemic template. Once the Stellar Gateway is consciously connected with the "lower", or physical, chakras; your life will improve, not only in the level of your relationships, but in the manifestation of truthful desires of the Soul.

Normal emotional, spiritual and even physical blockages will disappear, being dissolved through the infinite Law of Grace because now, your entire cellular system will be connected with and channeled through the real Divine cellular energies.
