THE AXIS COELI – AXIS MUNDI ATTUNEMENTS

The heavens declare the glory of God.
The skies proclaim the work of his hands.
Day after day, they pour forth speech.
Night after night, they reveal knowledge.
They have no speech. They use no words;
no sound is heard from them.
Yet their voice goes out into all the Earth,
their words to the ends of the world.
In the heavens, God has pitched a tent for the sun.
It is like a bridegroom coming out of his chamber,
like a champion rejoicing to run his course.
It rises at one end of the heavens
and makes its circuit to the other;
nothing is deprived of its warmth.

~Psalm 19

WHAT ARE AXIS MUNDI AND AXIS COELI ATTUNEMENTS?

The Axis Mundi, or The Lesser Heavenly Cycle, and Axis Coeli, or The Microcosmic Orbit, are ubiquitous symbols¹ representing energy of rebirth and restoration cycles that cross diverse human cultures.

STELLAR
CODES

The image expresses a connection point between the sky and Earth where the four compass directions meet. At this point, travel and correspondence are made between higher and lower realms of planes of reality and human beings.

Communication from lower realms may ascend to higher ones, and blessings from higher realms may descend to lower ones and be disseminated to all. The spot functions as the omphalos, or navel: the world's point of beginning. This is the point where we find our anchor point in this incarnation, our cord that attaches us to all manifestations of life.

The symbol originates in a natural and universal psychological perception: the spot one occupies stands at "the center of the world." This space serves as a microcosm of order because it is known and settled. However, outside the boundaries of the microcosm lay foreign realms that, because they are unfamiliar or may not be well ordered, represent chaos, suffering, and pain.

The Axis Mundi / Axis Coeli images appear in every world region and can take many forms. The image is feminine, such as an umbilical cord providing nourishment, and masculine, such as a phallus providing insemination into a uterus. It may have the form of a natural object, such as a mountain, a tree, a vine, a stalk, a column of smoke or Fire; or a product of human manufacture, such as a staff, a tower, a ladder, a staircase, a maypole, a cross, a steeple, a rope, a totem pole, a pillar, or a spire. Its proximity to heaven may carry chiefly religious implications, such as a pagoda, temple mount, church, or secular, such as an obelisk, minaret, lighthouse, rocket, or a skyscraper.

The image appears in religious and secular contexts. For example, the Axis Mundi symbol may be found in cultures utilizing shamanic practices or animist belief systems in major world religions and technologically advanced "urban centers."

¹ They have also been referred to as the cosmic axis, world axis, world pillar, columna cerului, and center of the world

"Every Microcosm, every inhabited region, has a Center; that is to say, a place that is sacred above all."

AXIATONAL ALIGNMENT AND THE FOUR ROYAL STARS

"I beheld another splendor and the stars of heaven. I observed that he called them all by their respective names..."

I inquired of the angel, and he explained secret things and their names to me. He answered a similitude of those has the Lord of spirits shown thee. They are the names of the righteous who dwell upon the Earth², and who believe in the name of the Lord of spirits forever and ever."

~ Enoch³ 43:1-2

^{2 2} Using the key to star naming, we can infer that those seven stars are most likely named for the seven principal angels, all of whom at some time have lived or will live on the earth. Enoch also notes that four of those seven angels are the most important; they are called the "presiding angels."

³ The Prophet Enoch had a vision of the throne of the Lord of Spirits. He saw that there were four angels, one on each of the four sides, each praising and blessing the Lord of Spirits. He also beheld myriads of other people (Enoch

The four Royal Stars, also known as the Guardians of the Sky, were a group of stars noticed by the Persian astrologers, and mentioned by Zarathustra, around 3000 BC and used as a rudimentary season calendar.

All four stars are among the brightest 25 stars in the sky, having an apparent magnitude of less than 1.5. However, this particular set of stars was chosen because they are divided in the sky by approximately 6 hours apart in the right ascension. They are called "royal" because they appear to stand aside from the other stars in the sky. Throughout the year, each star is for several months "dominant" in the night sky, and one can guess the season just by noticing which star is dominant.

The four stars with their modern and ancient Persian names were:

- Aldebaran (Tascheter) - vernal equinox (Watcher of the East)
- Regulus (Venant) - summer solstice (Watcher of the South)
- Antares (Satevis) - autumnal equinox (Watcher of the West)
- Fomalhaut (Haftorang) - winter solstice (Watcher of the North)

In the early stellar cults, four Royal Stars, also known as "lords," were also referred to as the Watchers. Each of these stars "ruled" over one of the four cardinal points. For example, when it marked the Vernal Equinox, the star Aldebaran held the position of Watcher of the East. Regulus, marking the Summer Solstice, was Watcher of the South. Antares, marking the Autumn Equinox, was the Watcher of the West. Fomalhaut, celebrating the Winter Solstice, was Watcher of the North. Towers⁴ were constructed, bearing the symbols of these Watchers, for evocation. During the "rites of calling," symbolic gestures were given, and the names of the Watchers⁵ were called out.

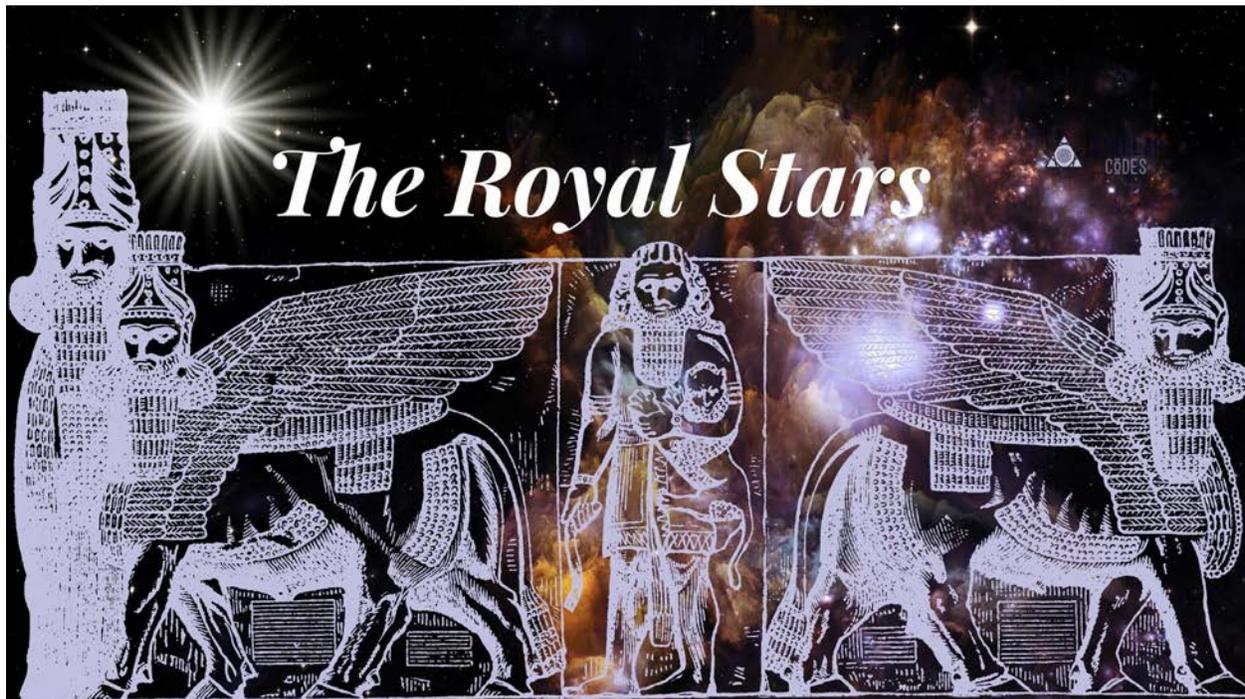

In the stellar mythos, the Watchers themselves were deities who guard the Heavens and the Earth. However, the successive Lunar and Solar Cults altered their nature and "rank," which replaced the Stellar Cults. Eventually, the Greeks reduced them to Gods of the four winds, and the Christians made them principalities of the air. However, their connection with the stars was vaguely preserved among the populace in the concept of Angels.

40:1-7). This vision was very similar to that of John in the Book of Revelation, who saw beasts on the four sides of the throne which were like a lion, a calf, a man, and a flying eagle (Rev. 4:7). The angel tells Enoch not only the names of these four presiding angels, but also their responsibilities.

⁴ This is also where the practice of referring to the four principal archangels as The Towers came from.

⁵ The four celestial beings are precisely this - they are the protectors of mankind and also the Agents of Karma on Earth, whereas the Lipika are concerned with Humanity's hereafter. At the same time, they are the four living creatures "who have the likeness of a man" of Ezekiel's visions, called by the translators of the Bible, "Cherubim," "Seraphim," etc.; and by the Occultists, "the winged Globes," the "Fiery Wheels," and in the Hindu Pantheon by a number of different names. All these Gandharvas, the "Sweet Songsters," the Asuras, Kinnaras, and Nagas, are the allegorical descriptions of the "four Maharajahs." Blavatsky, Secret Doctrine 1 126.

WATCHERS OF THE DIRECTIONS AND ENERGETIC FIELDS

The year is divided into four because we have four clearly defined seasonal events with two equinoxes and two solstices. Likewise, our twenty-four-hour day has four quarters of sunrise, noon, sunset, and midnight. This quartering of the circle is an ancient and worldwide practice.

The fourfold division of time seems to lead naturally to a fourfold division of space, and the custom overages have been to denote sunrise and spring to the east where the day begins. West is sunset and autumn. North, which most cultures think of as "above," is noon and summer, and south is "below," the place of midnight and winter. The Royal Stars of Persia⁶ are so named because roughly 5,000 years ago, during the fabled pyramid age of Egypt, these luminaries held tremendous influence. Endowed with almost archangelic power, these legendary stars of antiquity are Aldebaran, Regulus, Antares, and Fomalhaut, and in the epoch of 5,000 years ago, they were considered to be guardians of the four corners of heaven and watchers of the directions, forming a heavenly cross near the ecliptic.

⁶ The four Maharajahs (the Lords of Karma) and are the focal points for karmic influence in connection with man. The four Maharajahs are the dispensers of karma to the Heavenly Men, and thus to the cells, centers, and organs of His body necessarily; but the whole system works through graded representatives. Bailey, Treatise of the Cosmic Fire 468.

They preside over the attractive forces and distribute them justly. They enter, pass to the center of the sphere and there (if I may so express it) locate, and set up the "Holy Temple of Divine Justice," sending out to the four quarters of the circle the four Maharajahs, their representatives. Bailey, Treatise of the Cosmic Fire 1183.

THE AXIATONAL INITIATION AND ATTUNEMENT

There are two distinct phases for the complete Axiatonal Initiation and Attunement. The first is the Axis Mundi, and the second is the Axis Coeli.

The Axis Mundi reconnects and activates the Subpersonal Chakras, starting with the Earth Star Chakra, to the Earth. A good analogy is grounding spike driven deep into the ground. The Axis Coeli reconnects and activates the Transpersonal Chakras, starting with the Soul Star Chakra, with the Divine. A good analogy is a lightning rod.

The Axis Mundi and Axis Coeli are connected by way of the Hara Line, which sits one level outside and above the seven physical chakras and forms a line from the Soul Star Chakra to the Earth Star Chakra and is anchored to the physical body through the Tan Tien. A good analogy is a wire that connects the lightning rod to the ground spike.

The Axiatonal Initiation and Attunement is a Spiritual manifestation of Balance. While these Attunements can be done at any time, there are times when they can be done more efficiently, and the Teaching Master requires less energy to make the initial connection. This is particularly helpful when doing the Attunement for many people. The Axis Mundi Attunement is most effective when done on the Equinoxes. The Axis Coeli Attunement is most effective when done on the Solstices.

Full Axiatonal Attunement and Initiation allows an individual to BE a true Column of Light between Divine Source and Mother Earth. The individual becomes one of the Threads in the building of the Planetary Antahkarana.

There are two main objectives of each Attunement. The first is the connection⁷, which allows you to build the bridge. The second is flushing, cleansing, and activating all the meridian points in our bodies.

The Axiatonal Initiation will firstly and permanently fasten your own God Self energy into your physical body integrating the divine energy permanently into your energetic centers⁸.

Humans have a field of subtle energy around themselves, often referred to as the Auric Field, aura, or etheric body. This energy is made up of emotional, spiritual, and mental particles. We also have Axiatonal lines, energy pathways that supply our physical bodies with vital energy.

This energy extends from the ground, into the atmosphere, and out into the universe. The Axiatonal Alignments are simple yet powerful "tune-ups" of the energy system. It is a powerful healing tool that works to reconnect and realign the body's meridian lines to enable your energy system to function smoothly. It rejuvenates all levels of the body: physical, mental, emotional, and spiritual.

This is not simply an Axiatonal repositioning as performed by other energetic healers. Instead, these are tools to anchor your life purpose into your bodies of Light, along with the Stellar Syllables of the four Royal Stars as the graphic configuration of these higher vibrations into a safe and sound energetic matrix board.

⁷ The connection is made through an Aka Chord.

⁸ The aligning frequencies of the Axiatonal attunement naturally travel along our closed 5th dimension circuit loop, which reaches out into the universe and other star systems, all-star systems are linked into a Macrocosmic Stellar balanced system. The Axiatonal Attunement is important because when a person is not fully linked, or correctly rewired, and receives just the frequencies without full integration of the Stellar Codes™, they can simply wear off or be nullified by the environment. Without the circuitry in place there is a comparison to taking a homeopathic remedy (another vibrational energy) and when the frequencies wear off another dose is needed.

Axiatonal is the term used to express the procedure of reconnecting you with the Earth's Axiatonal Lines, minimizing the harmful effects of certain lay lines and energetic grids⁹.

This initiation and Attunement are recommended for those who channel energy, distant healing, and remote viewing.

With the Axiatonal Initiation, your Soul will create a four-foot diameter Grounding Chord that will help the development of the personal Antahkarana and the permanent building of the planetary Antahkarana. The Axiatonal Attunement will also facilitate reconnecting you with your Cosmic Self, your Star Seed dimension.

It will help burn off and dissolve the three lower levels of Consciousness formed originally by material or physical atomic structure, which we usually regard as below the Veils of Paroketh on the Tree of Life. It weaves a Stellar Bridge between your Solar Angel, your Christic Body (the Christ-consciousness energetic field), your Buddhaic Body, your Oversoul, your Etheric Light Body, and your "I AM" Presence (God Self) into your physical body and fully anchors each of them permanently into your immediate reality.

It will help eradicate all Beings and/or Entities from your Crown Chakra and spiritual space. It brings you into a state of Sovereignty. All of these attributes are crucial in the process of full Spiritual Enlightenment.

The Axiatonal Attunement will make possible the anchoring of your God Self: the energies and directives of your Monad. With the constant Attunement and anchoring of these new vibrations, one can progressively cause the Light from the spiritual bodies, such as the etheric light body, to exude the radiant Light of Universal Grace out through the pores of the physical vehicle.

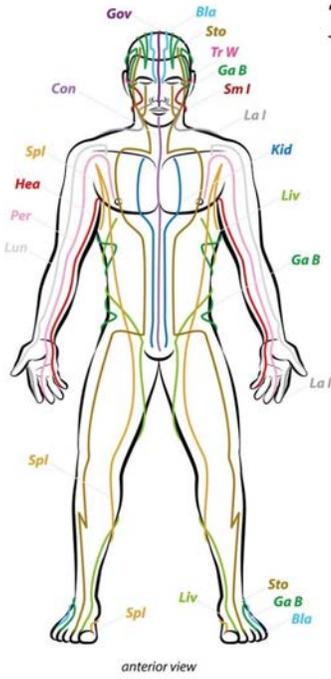

The two major steps of the Attunement manifest spiritual experiences, known as Equanimity¹⁰, which will provoke the sensation of lightness and the certainty that you are more grounded and feel completely aligned with the present time. At the same token, you will feel your need for material aspirations to decline with time.

You will notice that you will gradually become more and more emotionally detached.

⁹ The lines which tie the magnetic domains together are axiatonal lines.

¹⁰ Equanimity is a balance protection from the "eight worldly winds": praise and blame, success and failure, pleasure and pain, fame and disrepute. Becoming attached to or excessively elated with success, praise, fame or pleasure can be a setup for suffering when the winds of life change direction.

WHAT TO EXPECT AFTER THIS EMPOWERMENT

Directly after this Attunement, you may perceive that you may feel as you have slipped into a deep meditative state which can sometimes last anywhere from a few hours even to several days. This very peaceful state is a period in which your physical body begins to raise its vibratory rate to better integrate the higher frequencies of the Higher Self into the body.

You may feel a need to stay by yourself and avoid contact with outside dissonant vibrations for a while. However, when you connect deeply with your God Self or the monadic Self, you tend to jump-start your enlightenment process in a very efficient way. The new soul energies help you heal old wounds eliminate old contacts, cords, and attachments-impurities of the diverse bodies as the ensoulment progresses.

This Attunement gradually will assist you in building a new you, like a process of rebirth on a new energetic grid field, as the energy of the monadic Self, the God Self, is thoroughly grounded in your physical body.

One way of giving intent for ascension is to reinforce the axiatonal activation. While many people draw the axiatonal lines or give meditations with imagery, the key is about giving intent and involving our guides and helpers to speed up the process.

This is a route that, little by little, will give you the instrumental tools to become more active spiritually and emotionally detached from the areas of your life you cannot control. With time, you will develop serenity and be fearless. You will also feel that your psychic abilities¹¹ will surface more easily and naturally. It will be a long-lasting phenomenon that will manifest new facts in your life. As your energy centers absorb the new vibrations, your pineal gland is keenly activated; therefore, your perception level will dramatically improve.

The Axiatonal Alignment is a powerful energetic upgrade. There is no higher evolutionary programming except for the full Stellar Code™ Matrix Mastery encoding. As a result, it will link us back into the Universal grid system in the Macrocosm to receive new information for our evolution. If not, we are resorted to going back into the overall flux or magnetic flux when the system is disconnected and fragmented.

The Axiatonal Attunement also allows us to activate the DNA strands of our live energy template. It can be compared to rebalancing and rewiring the body's electrical system with an upgraded battery and life expectancy.

¹¹ The healing frequencies activate the pineal gland, the master controller of the bodies systems, resulting in the growth of psychic abilities.

THE ETHERIC BODY TEMPLATE

The etheric body template interacts with the physical body, but its Matrix is from a higher vibrational circuit of energy. In the time of the fall, when the major separation from our higher Self occurred, the energetic grid of energy lines, called the axiatonal lines, got somewhat disconnected and distorted from the connections with the 5D up energetic Matrix.

These axiatonal lines were conceived to feed our beings with the Divine Light coming from 5d and above. Also, it was designed to circulate the energies personified in the 4th-dimensional system of acupuncture meridians.

This meridian system synthesizes the cosmic Prana and redistributes it throughout the physical body and its organs.

Nowadays, this system barely cares for the minimum functions of the physical and energetic nourishment of the body.

All the diverse influx of cosmic energies that were supposed to be in circulation in all of your system of bodies could no longer be done due to the disconnection with the original grid of energies. Because of this, our mind grew to be only used to only Self-references: Self-will and Fear.

When we upgrade our ways to process information through the expansion of Consciousness, we realize that our lower Self is part of a bigger picture, just one of the many aspects of our Higher Self and your Oversoul: our Soul Self.

The reconnections with the Oversoul level function as the gateway to re-assimilate the higher levels of Self and their experiences, knowledge, and Wisdom. This phenomenon is called "Descension of the Spirit," It is one of the clear steps to facilitate our ascension to higher dimensions.

The intention of reconnecting is everything in this process. Understand that your Higher Self is also stuck from reaching higher levels of evolution because of the illusionary separation from its extensions and personalities. Only when we are complete can we return to wholeness.

The Steps:

1. Once long ago, we used the power of free will to separate ourselves from the Soul and Monadic Source. Now, we shall exercise the same power to build our reconnective ladder back to Source. The Antahkarana is the bridge we must build through willpower, intentional meditation, and volition.

2. To incorporate oneself with rebuilding the original energetic template and realign our energetic centers, we shall recall our Divine nature and our Sovereignty. The key is the unconditional acceptance of Self and different levels, behaviors, and attitudes. The Higher Self sees all the life experiences as beneficial learning situations and a repository of knowledge to be gathered and assimilated by the entirety of the Soul. Therefore, there will never be a judgmental attitude from your Monad towards you; their vibration is always of all-inclusive compassion.

This type of perspective will shift your vision in how you relate to the thought of Oneness. Once you absorb the concept of Oneness with All entirely, there will be no energetic space for Fear and disharmony to take shelter inside of your matrix space. This also helps us realize that everything around us is an expression of something we created inside.

GRIDWORK

Grid Work is considered a highly developed Healing technique since the results are generally a quantum leap for most of its recipients. It happens either by enhancing their physical, emotional, psychological health or dramatically improving their abilities to assimilate and condense higher vibrational stimuli and Light into our spiritual system.

Axiatonal Integration or Axiatonal Attunement is a procedure in which the body and mind are better prepared to be acclimated to optimum physical, psychological, and spiritual energy levels. In short, Axiatonal Integration or Axiatonal Attunement will prepare you for great positive change if you choose to take that journey. The Axiatonal Upgrade is a gift of choice. Agreeing to it creates a new step towards the betterment of the Human Species. But, of course, not everyone will choose to have it done. At any time, we may assume that only less than 70% of humanity is in agreement about anything to be done collectively on the planet!

Once the axiatonal lines are activated, the Oversoul transmits the appropriate color/frequencies to regenerate the physical body and integrate it into the Lightbody. Then, at appropriate times, the Oversoul the Lightbodies descend.

AXIS MUNDI-AXIS COELI PRE-ATTUNEMENT PROCEDURE

The Axis Coeli and Axis Mundi are a part of the Stellar Code™ Matrix Mastery Program that is open to those not participating in the complete Stellar Code™ program.

It is essential that after the Attunement has been scheduled and before it takes place, the Aspirant studies the Guidebook to understand the underlying principles of the Attunements.

This is very important! If there are questions, please contact us so that we can discuss them with you.

Please note that the Attunement and Initiation are done energetically and at a distance. It is not done via a teleconference. Instead, the Teacher makes the energetic connection between Aspirant and Master Teacher through the Soul Stars. We use this technique because the work done is not with the physical body but with the subtle bodies and higher planes.

At the appointed time of the Attunement, the Aspirant should find a quiet place where they can be undisturbed for about an hour. They should then recite the Soul Mantra and place themselves in a receptive meditative state. The Master Teacher does the work at this point, facilitating the connection with the Initiate. Cleaning and Balancing are always done as the first phase of the Attunement process. The Aspirant will feel when the process is over, and it is always recommended that they write their impressions and experiences down before they fade.

It is also recommended that the Initiate plan on getting a full night's sleep after the Attunement.

If there are questions about the impressions/experiences/visualizations/dreams/etc., please email us so that we can schedule a time to call and discuss them.

The Attunement will continue to filter through your subtle bodies for 21 days afterward, with the strongest impressions being in the first seven days. Careful notes should be taken of any dream experiences, and we encourage you to discuss any questions you may have about them with the Master Teacher.

The Stellar Code™ of Attunements is powerful. In recognition of that, we strongly recommend these additional guidelines:

- 1) No alcohol 24 hours prior to the Attunement
- 2) Drink plenty of water before and after (or the following apple drink)
- 3) We suggest drinking the following apple drink on the day of the Attunement. To prepare a gallon, mix 1/2-gallon apple juice, 1/2-gallon water, 2 tbsp apple cider vinegar, 1 tbsp honey. Of course, you don't need to drink this much, but this is how we make it. This is very good for internal purification.
- 4) We suggest you take a bath with a little baking soda and apple cider vinegar in it the night before and the night after the Attunement. Not only is it relaxing, but it is good for cleaning your energy field. You may prefer to take a bath in the ocean instead, which also works great. What is important is to acidify your auric field through the apple cider vinegar bath, the baking soda bath, or the ocean bath.
- 5) We do not have a dietary requirement, but we strongly suggest you eat light foods before the Attunement, i.e., no super-sized Big Mac meals. 😊
- 6) We recommend you keep a journal
- 7) As a cleansing practice, try to avoid people or situations that you know may disrupt your mood, if possible. If not, try to dedicate at least 5 minutes a day to doing a balancing breathing exercise

PROCEDURE TO RECEIVE THE AXIATONAL ATTUNEMENT

First and foremost, you must choose a quiet place and retreat from outside disturbances for a while. This is a vibrational process that will require your conscious attention.

THE SOUL MANTRA

Activate your Soul Star through the Soul Mantra ¹²

I AM the Monad,
I AM the Soul,
I AM Light Divine.
I AM Love,
I AM Will,
I AM Fixed Design.

THE MANTRA FOR CONNECTION

The following mantra should be said seven times upon going to sleep and waking up for the seven days following the Attunement.

KODOISH, KODOISH, KODOISH, ADONAI TSEBAYOTH ¹³

This mantra¹⁴ creates the mental and spiritual time warp within your body, which allows you to grow from a small microcosm into the next level of Godhead.

BREATHWORK

This Axiatonal Attunement is realized in two phases.

The first is anchoring your Aka Cord going from the center of your heart chakra, activating the heart fires in conjunction with the meridians and other etheric structures to facilitate the alchemy of the fires of heart into ether fire, and therefore anchoring the Fire of the sacrum plexus.

The second is the flushing, cleansing, and activation of all the meridian points in our bodies.

¹² Repeat three times. For more information about the Soul Star and the Transpersonal Chakras, read *Awakening the Divine Internal Stars* by Humanity Healing.

¹³ The translation of this is Holy, Holy, Holy Lord of Hosts.

¹⁴ The source of this mantra is Kabbalah.

Rhythmic breathing plays an important part in this Attunement, and the activation of the fires of ether inevitably changes the way we breathe and process light information.

This transformation brings a new concept and potential to life, the prospect to breathe from your heart. The Spiritual Heart breathes through its vibrations and beats.

Your Spiritual Heart breathes naturally, while your physical heart transports the blood through the circulatory system.

It is essential to know how to control and regulate the fires of the heart to allow the fires of the sacrum to awake, develop, and grow.

One breathing technique is well known within many different schools of knowledge vital to fomenting this process. It is necessary to ignite the ether fires to purify and flush out your Meridians any energy inconsistent with the higher frequencies you are about to absorb and anchor.

Ageless Wisdom teaches that the act of respire, to breathe, is intimately connected with the expansion of Consciousness.

You can witness this when you see someone hyperventilating. There is often an alteration of the state of Consciousness. Hyperventilation is sometimes provoked when doing therapeutic rebirth processes and Trauma healing.

We will try to emulate hyperventilation at the first stage of preparation based on a Pranayama exercise to awaken the Fire from the Sanctum. Then, in the second stage, we will activate and reconnect the "Triple Fire," composed by the radiant crown of your Head, the Radiant Halo of your Heart, and the Sacred Triangle.

Sri Aurobindo describes this technique as the Breathing of the OPEN Mouth.

The Egyptians knew the meditation and breathing with the OPEN mouths as the Ritual of the Opening of the Mouth to allow the Soul's passage. We do this naturally when we come into this world, and it should be the last way to breathe before we leave it.¹⁵

The axiatonal technique will assist you to breathe literally through your heart chakra.

All the Pranayama exercises you do will eventually anchor your breathing to work through your abdomen and learn how to hyperventilate with restrictions and alternate breathings.

When you activate your Soul Star, you will see that your breathing will be lighter and may even give you the impression that it is almost out.

¹⁵ It is an interesting observation that one of the breathing techniques involved with childbirth utilizes a similar pattern on the part of the mother.

As you practice the Opening of the Mouth, you should breathe in air and try through Consciousness to direct the breathing into the heart, and at the same time, you let the air out with the sound of ahh or haaa.

The breathing pattern should be light hyperventilation through the mouth, similar to the Breath of Fire breathing technique.

You may feel the vibrations echoing through your body as the music of a harp, and the Harp is your own body. The fingers into the Harp are from the "hands" of your activated Consciousness.

Meanwhile, concentrate on your body and feel your Consciousness traveling through all the energetic centers of your body. Gradually you will feel that with the Consciousness centered in your heart, your breathing pattern will be matching the beatings of your physical heart.

While flushes of Consciousness travel through your centers, vortexes, and meridians from your Heart Center, you can control what Sri Aurobindo calls The Switch of Consciousness, from the dual perspective of the 3d reality planes of existence to a Unified Consciousness of the interconnected Universe in expansion.

After a while of practicing it, the Fire of the heart alchemizes itself into the ether fire, stimulating the Radiant Crown and the Fire of the Sacrum.

Through this meditative state, you will be able to perceive the activation of the other fires through the ether fire and feel the resonance in the sacrum level. Whatever may be the perceptions acquired during this procedure, keep yourself centered in practice, breathing through the heart and with the mouth opened, just vibrating with the energies and with silence.

Some will be feeling very sensitized by this technique and may perceive not only the fires of ether but also the fires from the sacrum region and a point behind the Head, the point known in various traditions as the Mouth of God, or the Eye of the Warrior¹⁶, or as the Omega Point.

This breathing technique does not require much work but will enable you to shift the limited breathing of this world to the unlimited breathing of other dimensional realities.

You may feel your body heat up because the ether fires are real and controllable. You may also feel the heat in your heart center. Those are essential elements to form and build your interior Temple.

¹⁶ The point where you allow seeing behind yourself and through this switch the consciousness and awareness from inside out and upside down.

You may feel extremely sleepy after this practice. Allow your body to rest because it will need time to assimilate the new influx of energies.

SYMBOLS

The symbols, or syllables, for the Axiatonal Attunement and Initiation, are not required for the recipient and are part of the Teaching Master Program¹⁷.

APPENDIX OBSERVATIONS

According to ancient "lost" sources of information, there is a reason why we have continued to be in conflict over spiritual methods and religions.

These notes are just a brief overview of some observations left as clues from Ageless Wisdom schools of thought. These notes should be observed as a scientific reminder, not having anything to do with specific religious visions and perspectives.

Initially, human beings were conceived to operate at a higher frequency silicate level in a less dense "physical" biological format.

The Fall of Man threw humankind into a much denser carbon-based biology, and it had the general Matrix distorted from the tilt of the Earth's magnetic axis, which is 23.5 degrees. This provoked a distortion in how we receive and assimilate higher energies into our matrix template. The tilt created many repercussions, one of them being a multitude of astral realms. The beings and creatures that populate these realms are thought forms transformed into "living creatures," originating from our creative process: thoughts imbued with intentions. They are not necessarily Living Beings. They are creatures.

Originally when coming to Earth, our energetic meridians, our vortex centers, and our brains are aligned with the planet's electromagnetic fields, which influences us differently, depending on the level we interact with the Microcosmic and Macrocosms.

For many centuries, we have invested solely in studying the effects of the Pineal Gland, but still, the practices are influenced by the imbalances of our Earth. The imbalance of 23.5 degrees in one way detaches us from the original true Source of Light. This does not mean we are prevented from connecting with Source, but it has created more obstacles and distortions in our pursuit of enlightenment and ascension. This makes it almost impossible for most of us to perceive reality as we were intended to do since the beginning of time.

As a result, even after finishing all that was created on the karmic journey through lifetimes, many of us can come back repeatedly to the Wheel of incarnations because of missing the point of "escape."

With the Axiatonal Alignment, the configuration of your meridians will be restructured and reconnected with the Christ-consciousness, the giver of life, and gently tilted to the right side of your brain. Along with the cleansing of the Meridians, this will cause a significant increase of electrical charge inside of your system of bodies and will facilitate your pineal gland to rotate the proper way, right back on its original center.

This process is done from the higher chakras above your Head – the transpersonal chakras going downwards through a process known by the Ageless Wisdom as Righteousness.¹⁸¹⁹

These adjustments require specific meditation practices that directly address the imbalance currently pulling the brain off Balance to the "left." It is a dark force of "dead or static light," which is also described as reflected Light, i.e., it is not the actual Source of the Light. If you want to understand more about how the Static Light has influenced us, please reflect upon Plato's Allegory of the Cave.

The replicate "Way" is the mirror reversal of the real thing, yet everything that goes into the "mirror" stays there, constantly replaying because it cannot escape. The "magnetic mirror" is "trapped light." A great many of our masters and gurus, even from the lengthiest of ancient lineages, are masters of the reflected Light simply because logic and spiritual logic automatically dictates that the "balance" is in the "center." But the center can only be determined by electromagnetic positive/negative currents flowing in alignment with a solar, then galactic, then universal center. If that central alignment is broken off, if our Axis Mundi / Axis Coeli is damaged and distorted, all the efforts directed to a collective ascension can be deceiving and unfruitful.

The Axis Mundi and Axis Coeli, as we discussed before, is a representation and alignment of our tree of life. Therefore, the only way to re-establish the connection with the Divine is to work on oneself to shift the receiving of Light from static Light to the "living light" of Christ-consciousness.

To avoid being wronged or deceived by any system, which includes the many that genuinely did not know about the error of the planetary alignment and axial lines related to it, your meditation practice must address the "right side" correction of the rotated pineal to escape the Wheel of Rebirth and raise yourself or ascend enough to escape the Wheel.

This is the ancient knowledge that came from many masters through time; It was the Science of Galactic and Universal Alignment Physics, not specifically religious work.

¹⁸ These practices were once taught by the Essenes, and their Masters, including the Master known as Jesus, and a teacher role described as the Teacher of 'Righteousness', amongst others who were also guardians of this sacred information.

¹⁹ The Hebrew word for righteousness is tseh'-dek, tzedek, from Strong's Exhaustive Concordance of the Bible:6664 — righteous, integrity, equity, justice, straightness. The root of tseh'-dek is tsaw-dak', Strong's Concordance:6663 — upright, just, straight, innocent, true, sincere. It is best understood as the product of upright, moral action in accordance with some form of divine plan.

In the Book of Job the title character is introduced to us as a person who is "perfect" in righteousness. This does not mean that he is sinless. "Perfect" in this sense means that his righteousness permeates every relationship of his life as his working principle.
